Definition: A school is a division of the school system consisting of a group of pupils composed of one or more grade groups, organized as one unit with one or more teachers to give instruction of a defined type and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary programs are housed in the same school plant.

SCHOOL ACCREDITATION
1983-84

The term "elementary school" refers to the first six grades but may include, depending on organization, the first seven or eight grades. The term "secondary school" refers to a school which includes any combination of grades seven through twelve. By this definition all junior high and high schools are secondary schools.

	Secondary	Elementary	Special Schools
Accredited:			
Public	366	604	23
Nonpublic	66	80	
Total Accredited	**432**	**684**	**23**

Reporting for accreditation is done on a prescribed organizational pattern. Frequently a school that includes grades 1 - 12 will report to the accrediting agency as three separate organizations: grades 1 - 6, 7 - 9 and 10 - 12. Consequently, the number of schools accredited is always at variance with the total number of schools in other tables.

Note: The dropouts on this page represent the number of dropouts in a given year as a percent of the enrollment. Many of these children return to school the next year and possibly dropped out again the next year. Pages 14 & 15 should be studied to get the true picture of the number of pupils who start school in grade one and stay in school to graduate. Page 15 shows the number of fifth graders who remained in school and entered the twelfth grade seven years later.
